

First steps: Key buttons on microscope

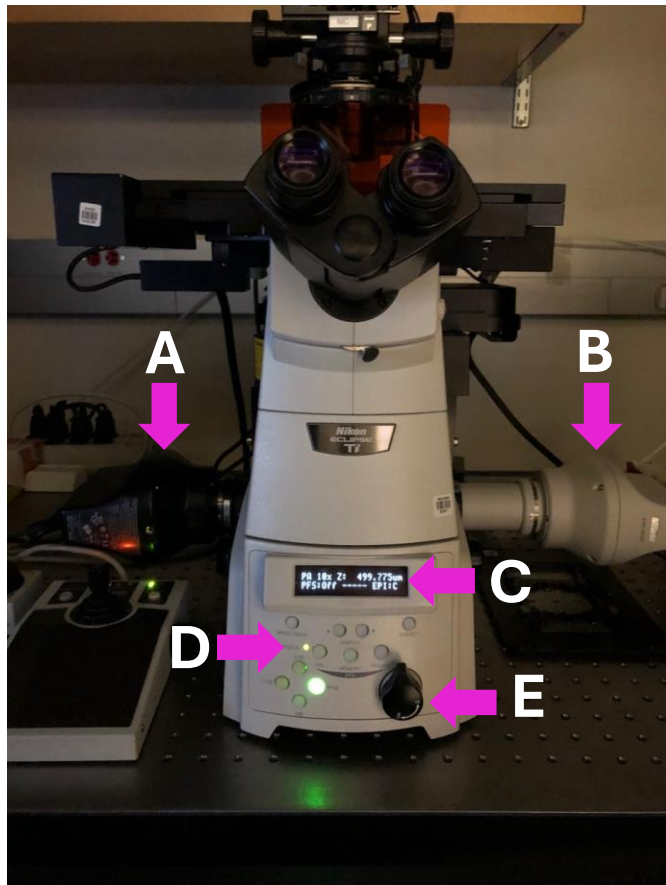

A = Qi2 fluorescent camera (6D only)

B = Ri2 color camera (6D only)

C = Current objective lens in position (10x, 20x, etc.) and lens (Z) height in um

D = Perfect focus button (PFS)

E = 1.5x magnifier (turn to the right to use)

F = course, fine, extra fine focus

G = Refocus (brings objective back to previous focus height)

H = Escape (drops objective down to the safe position of 500um)

I = Focus knob (changes objective height; z-position)
